Benefits

- Never re-key locks when an employee quits or gets fired.
- Doors can be locked to the general public yet retain access for all employees.
- Employees can be time/day restricted from gaining access.
- Multiple sites can be controlled from a single software application.
- Can be integrated with most existing equipment.
- Complete facility or area lock-down from any reader or a single mouse click.

ACCESS CONTROL

Question: What is access control and how can my company benefit from it?

Answer: An access control system is a system which enables an authority to control access to areas and resources in a given physical facility. An access control system, within the field of physical security, is generally seen as the second layer in the security of a physical structure.

Your company can benefit from this facility management resource that lets you regulate who goes where and when. It controls individual access at all system

controlled entry points which can be doors, elevators, parking gates, or garage doors. It protects your personnel, intellectual property, inventory, equipment, and buildings 24 hours a day, 7 days a week, 365 days a year. And because it has an internal database logging each and every system transaction, you have a record of everything that's

happened on your system. Active mapping provides visual representation of active sites, with building floor layouts, and annunciates, real-time on screen, door status, alarm points and input status. Camera locations can also be identified on the map with active camera icons providing an instantaneous link to the live camera feed for that building location and camera. Power users of the active mapping module will appreciate the multi-map capability with map linking ability.

Solution: Keyscan Access Control System

Our entire line of card access systems utilize the latest in a variety of leading technologies to allow you flexibility in designing a system to meet your needs. Technologies include biometrics, proximity, and code keypads.

Current Rampart clients utilizing the advantages of a Keyscan Access Control System:

Frick Hospital

Westmoreland at Jeannette Hospital

Latrobe Family Practice

Norwin Hills Surgical Center

Owens and Minor

Ex One Company

Smart Parts Inc.
